

# ROOF HOOK **SLATE SET**

The flashing is made from aluminium with a specially bonded EPDM cone integrated into it for weatherproofing. The EPDM has a high performance in resisting UV, so it doesn't crumble with exposure to sunlight.

The aluminium flashing replaces the roofing tile.

Designed for small rafter widths. The metal plate sits so that its longer edge runs in the same line as the rafter and fixes into it using 2 screws.

**2.50kg/m<sup>2</sup>**
